

# CS265 – Assignment 0

David Miller

---

## 1 Bio

I am David Miller, I have zero clue if you actually want us to type this so the most basic response I have is that I am a 2nd year student within the 5yr CS - Bachelor's program at Drexel University.

### 1.1 Programming Languages

- Java
- Python
- C++

### 1.2 Editor

I am currently using the VIM editor however in the past I have grown fond of VS Code.

## 2 Notes

My program does primarily use try, except statements for its selective cases. In the program some nasty things could also be the ternary statement and the casting within a method call. Overall it is a compact program that completes the assigned task.
